

## Reference Letter

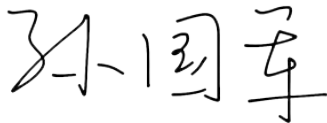

Dear Sir or Madam

From November 24, 2021 to January 31, 2022, Zheren Huang as an intern worked in the software development position of the our company's quality center. I feel that I have accumulated enough observations for writing a reference letter to support his graduate Application.

Before the internship, Zheren Huang had studied at the university for only two years and did not graduate. His foundation is poor, and he did not meet the company's standards actually. But he had am amazing self-study ability. Within a few weeks, he quickly made great efforts to catch up, and mastered the computing language C++ and SVN operations. For the company projects, Huang completed the cross-platform writing of ini configuration files, such as the structure setting of multithreading and many operation functions of Application Virtualization, which contribute a lot to his group and company. In addition, Huang has also made considerable progress in computer algorithms by actively communicating with colleagues and asked for advice during his internship, including linked lists, knapsack problems and Red Black Tree. These achievements are strong proofs of the ability of Zheren Huang, so I believe that he will perfectly suit your school. Other than work, Huang also participated in several activities of the company, he showed his leadership and unyielding faith in company's basketball competition.

Zheren Huang is an excellent employee with many admirable characteristics. I strongly recommend him to your school. He will become an outstanding member of your team and make a great contribution.

If you want to know more about him, please feel free to contact me.
